**PETITION FOR CONFIDENTIAL TREATMENT**

Kentucky Power Company ("Kentucky Power") moves the Commission pursuant to 807 KAR 5:001, Section 7, for an Order granting confidential treatment to Kentucky Power's Response to Staff Data Request No. 19(b).

Pursuant to 807 KAR 5:001 an original of the responses for which confidential treatment is sought is filed as part of Kentucky Power's original filing in response to the Information requests. In addition, ten redacted copies of the subject Response are filed with the other Responses to the Data Requests.

A. The Request And The Statutory Standard.

Staff Data Request 19(b) requires Kentucky Power to file and disclose:

For each solicitation [for coal purchases issued during the period November 1, 2009 to April 30, 2010], state the number of vendors to whom the solicitation was sent, the number of vendors who responded, and the selected vendor. Provide the bid tabulation sheet or corresponding document that ranks the proposals. (This document shall identify all vendors who made offers.) State the reasons for each selection.

Kentucky Power does not object to providing to the Commission the data sought in Staff Data Request 19(b).

KRS 61.878(1)(c)(1) excludes from the Open Records Act:

Upon and after July 15, 1992, records confidentially disclosed to an agency or required to be disclosed to it, generally recognized as confidential or proprietary, which if openly disclosed would permit an unfair commercial advantage to competitors of the entity that disclosed the records.

This exception applies to Kentucky Power's response to Staff Data Request 19(b).

B. Kentucky Power's Fuel Procurement Practices And The Competitive Fuel and Energy Markets.

Kentucky Power's bid solicitation is handled by the fuel procurement personnel in the Fuel, Emissions and Logistics group of American Electric Power Service Corporation ("AEPSC"). In negotiating fuel supply and transportation agreements, AEPSC seeks to obtain the lowest reasonable delivered cost of fuel for the Company's customers. Fuel and transportation suppliers, on the other hand, are interested in obtaining the highest price possible for their commodity or service. Making future pricing, or company strategy with regards to fuel acquisition or other competitively sensitive information available to the suppliers with which the Company is negotiating compromises AEPSC's ability to obtain the lowest reasonable cost of fuel for customers.

C. The Information Is Generally Recognized As Confidential and Proprietary.

First, the records to be filed with the Commission are "generally recognized as confidential or proprietary." The request calls not only for proposals made by the various coal bidders, but also for the internal evaluation of each bid. This bid information and evaluation is highly confidential, and confidentiality is critical to the bid process. Dissemination of the information for which confidential treatment is being requested is restricted by Kentucky Power and AEPSC, and the Company and AEPSC take all reasonable measures to prevent its disclosure to the public as well as persons within the Company who do not have a need for the information.

In further support of this Request for Confidential Treatment for the data sought by Data Request 19(b), Kentucky Power incorporates by reference the Company's similar Motion and Pleadings in prior Fuel Adjustment Clause proceedings, such as Case Nos. 2008-00518; 2007-00522; 2007-00276; 2006-00507; 2004-00463; 2004-00211, 2003-00453, 2000-495-B, 98-562-A and 98-562-B. Kentucky Power further states that the Commission has not denied confidential treatment to similar information in prior fuel clause proceedings.

D. Disclosure Of The Information Will Result In An Unfair Commercial Advantage.

In general, the disclosure of the confidential information also will result in an unfair commercial advantage to competitors of Kentucky Power and its coal suppliers. For example, if a prospective coal supplier learns through review of AEPSC's analysis of responses to Kentucky Power's coal solicitation the Company was willing to pay \$25 per ton for a certain quality and quantity of coal, that supplier could resist lowering its price below \$25 per ton. Similarly, and by example only, knowledge that Kentucky

Power currently is paying \$22 to \$27 per ton under contracts executed after December 31, 2008 may yield a similar result. In either case, a supplier will gain an unfair bargaining advantage – an advantage that would work to the detriment of Kentucky Power and its ratepayers. Additionally, in either case prospective suppliers considering a bid of less than \$25 per ton would be inclined to increase their bid closer to \$25 per ton. Such a result is antithetical to the purpose of the bidding process and contrary to the goal of providing the lowest reasonable retail electric rates. Moreover, to the extent disclosure would result in higher coal prices, Kentucky Power's energy rates would increase. Accordingly, Kentucky Power would be placed at a competitive disadvantage vis-à-vis other energy suppliers, especially in the off-system sales market.

Equally important is the fact Kentucky Power is a regulated electric utility, with the Commission serving to protect the public interest in the absence of competition. If Kentucky Power's coal prices go up because of public disclosure of the commercially sensitive information, Kentucky Power, its customers and the regulatory process will suffer.

E. The Information Is Required To Be Disclosed To An Agency.

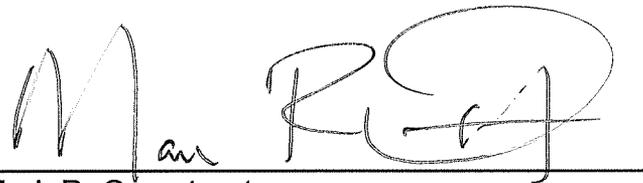

Finally, the records requested in Staff Data Request 19(b) are by the terms of the Data Request required to be disclosed to the Commission, a “public agency” as that term is defined at KRS 61.870(1). Kentucky Power acknowledges its coal purchase procedures are subject to Commission review, and that parties to this fuel clause proceeding should have access to the information sought through Staff Data Request 19(b). Any filing, however, should be subject to a confidentiality order and any party requesting such information should enter into a confidentiality agreement. If such an

agreement cannot be reached, the information should be subject to a protective order issued pursuant to 807 KAR 5:001, Section 7(5)(b).

Wherefore, Kentucky Power Company respectfully requests the Commission to enter an Order:

1. According confidential status to and withholding from public inspection Kentucky Power's responses to Staff Data Request 19(b); and
2. Granting Kentucky Power all further relief to which it may be entitled.

Respectfully submitted,

## Kentucky Power Company

### REQUEST

- a. State whether Kentucky Power regularly compares the price of its coal purchases with those paid by other electric utilities.
- b. If yes, state:
  - (1) How Kentucky Power's prices compare with those of other utilities for review period; and
  - (2) the utilities that are included in this comparison and their locations.

### RESPONSE

- a. No. However, Kentucky Power Company has compared its delivered coal costs with those of other Kentucky jurisdictional utilities for this case. This analysis was conducted using Ventyx's Velocity Suite service, which utilizes EIA 923 filing data.
- b. (1) During the period from November 2009 through April 2010, Kentucky Power's cost for tons purchased on a cents per million BTU basis was the highest of the five reporting utilities. Refer to the table below for details.
  - (2) Louisville Gas & Electric, Kentucky Utilities, East Kentucky Power Coop, Duke Energy Kentucky, and Kentucky Power Company all operate in the State of Kentucky.

Plant Operator Name	Average Delivered Fuel Price Cents/mmBtu
Kentucky Power Co	261.57
East Kentucky Power Coop	244.67
Kentucky Utilities Co	238.18
Duke Energy Kentucky	220.29
Louisville Gas & Electric Co	188.51

**REQUEST**

State the percentage of Kentucky Power's coal, as of the date of this Order, that is delivered by:

- a. Rail;
- b. Truck; or
- c. Barge.

**RESPONSE**

a. & b. From November 1, 2009 through August 13, 2010, 61% of Kentucky Power's coal was delivered by rail and 39% was delivered by truck.

## Kentucky Power Company

### REQUEST

- a. State Kentucky Power's coal inventory level in tons and in number of days' supply as of April 30, 2010. Provide this information by generating station and in the aggregate.
  - b. Describe the criteria used to determine number of days' supply.
  - c. Compare Kentucky Power's coal inventory as of April 30, 2010 to its inventory target for that date.
  - d. If actual coal inventory exceeds inventory target by 10 days' supply, state the reasons for excessive inventory.
  - e. State whether Kentucky Power expects any significant changes in its current coal inventory target within the next 12 months.
- (2) If yes, state the expected change and the reasons for this change.

### RESPONSE

- a. As of April 30, 2010, Kentucky Power's actual coal inventory level was 409,976 tons, or 40 days of supply.
- b. Days supply is determined by dividing the tons of coal in storage by the full load burn rate (tons per day).

$$\frac{409,976 \text{ tons in storage as of 4/30/2010}}{10,300 \text{ (full load burn rate - tons/day)}} = 40 \text{ days}$$

- c. As of April 30, 2010, Kentucky Power Company's coal inventory was 10 days over its target.
- d. The 10 day over target amount at the end of April is largely due to a decrease in demand in 2009 and Kentucky Power's obligation to accept coal from its vendors per the term of the contracts.
- e. No.

**REQUEST**

List each written coal supply solicitation issued during the period from November 1, 2009 through April 30, 2010.

- a. For each solicitation, provide the date of the solicitation, the type of solicitation (contract or spot), the quantities solicited, a general description of the quality of coal solicited, the time period over which deliveries were requested, and the generating unit(s) for which the coal was intended.
- b. For each solicitation, state the number of vendors to whom the solicitation was sent, the number of vendors who responded, and the selected vendor. Provide the bid tabulation sheet or corresponding document that ranked the proposals. (This document should identify all vendors who made offers.) State the reasons for each selection.

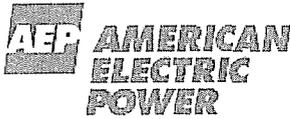

**RESPONSE**

There was one written coal solicitation from November 1, 2009 to April 30, 2010 with suitable coal for Kentucky Power.

- a. An AEP System solicitation was issued for both term and spot purchases on March 18, 2010 for compliance coal to be delivered by Rail, Barge or truck (if going to Big Sandy) with quantities up to 150,000 tons of coal per month, commencing as early as July 2010, with coal quality appropriate for the Big Sandy Plant. This document is included with Attachment 19a.
- b. The March 18, 2010 AEP System solicitation was sent to 44 vendors. A total of 36 vendors responded, with 13 providing bids suitable for the Big Sandy plant. Refer to Confidential Attachment 19b regarding these completed solicitations. Confidential protection of this attachment has been requested in the form of a Motion for Confidential Treatment.

American Electric Power Service Corporation (AEPSC), on behalf of Kentucky Power, has awarded a three year agreement to Rhino Energy and is extending its current agreement with Argus-Beechfork. As demonstrated in Attachment 19b, these suppliers provided revised pricing which made them the lowest cost provider of those suppliers with eligible and available coal.

## Kentucky Power Company

### REQUEST

- a. List all intersystem sales during the period under review in which Kentucky Power used a third party's transmission system.
- b. For each sale listed above:
  - (1) Describe how Kentucky Power addressed for FAC reporting purposes the cost of fuel expended to cover any line losses incurred to transmit its power across the third party's transmission system; and
  - (2) State the line loss factor used for each transaction and describe how that line loss factor was determined.

### RESPONSE

For the period November 1, 2009 through April 30, 2010:

Beginning on June 1, 2007, based on FERC Order EL06-055, PJM modified the Locational Marginal Pricing (LMP) approach to calculate transmission line loss costs on a marginal basis. The new LMP calculation will now determine the full marginal cost of serving an increment of load at each bus from each resource associated with an eligible energy offer. The LMP price will be the sum of three separate components: System energy price, congestion price and loss price. Therefore, each spot market energy customer will now pay an energy price that includes the full marginal cost of energy of delivering an increment of energy to the purchaser's location. Market buyers are assessed for their incremental impact on transmission line losses resulting from total load scheduled to be served from the PJM Interchange Energy Market in the day-ahead energy market at the same day-ahead loss price applicable at the relevant load bus.

Market sellers are assessed for their incremental impact on transmission line losses resulting from energy scheduled for delivery in the day-ahead market at the day-ahead loss prices applicable to the relevant resource bus.

Transactions are balanced in the real-time market using the same calculation, but are based on deviation at each bus from the day-ahead using the real time loss price.

**WITNESS:** Ranie K Wohnhas

**Kentucky Power Company**

**REQUEST**

Describe each change that Kentucky Power made during the period under review to its methodology for calculating intersystem sales line losses.

**RESPONSE**

Please see the Companies response to Item No. 21.

**WITNESS:** Ranie K Wohnhas

## Kentucky Power Company

### REQUEST

State whether Kentucky Power has solicited bids for coal with the restriction that it was not mined through strip mining or mountain top removal. If yes, explain the reasons for the restriction on the solicitation, the quantity in tons and price per ton of the coal purchased as a result of this solicitation, and the difference between the price of this coal and the price it could have obtained for the coal if the solicitation had not been restricted.

### RESPONSE

Kentucky Power has not solicited bids with restrictions that coal was not mined through strip mining or mountaintop removal.

WITNESS: Kimberly K Chilcote

## Kentucky Power Company

### REQUEST

State whether any PJM costs are included in Kentucky Power's monthly FAC filings. If yes, state the type and amount of the costs included during the period under review.

### RESPONSE

Yes. The total PJM net energy costs included in KPCo's monthly FAC filings for the six month period ended April 30, 2010, was \$1,022,582. These PJM net energy costs are exclusive of any capacity or demand charges (or other PJM charges or costs). The energy associated with the PJM net energy costs included in the monthly FAC is purchased on an economic dispatch basis and recorded in FERC Account 151.

The table below demonstrates the total full requirement customers' actual fuel costs for the six month review period ended April 30, 2010 was \$95,804,231 (Total Column 2). KPCo's PJM net energy costs for the six month period ended April 30, 2010 totaled \$6,089,937 (Total Column 3). KPCo full requirement customers' (Vanceburg, Olive Hill and the Kentucky retail customers) share of PJM net energy costs for the six month period ended April 30, 2010, and included in the monthly filings under review were \$1,022,582 (Total Column 4).

Attached is the monthly ECR report, Column CP, Item 44 for the six month review period ended April 30, 2010, which is the source document for the amounts in columns 3 and 4 below. Starting with the May 2010 back-up filings, a copy of this page from the ECR report was filed monthly with the Commission.
